Agilia® Infusion System
Large Volume Pump with
Vigilant Drug’Lib Software

The commonsense choice in smart infusion pumps
Designed to empower nurses and pharmacists with its simplicity, Agilia® Infusion System is the commonsense choice in smart infusion systems that helps you put patient safety first.

In one comprehensive package, Agilia Infusion System offers a friendly, lightweight pump packed with features and functionality that can adapt to the way you work and grow, and offers steadfast support to get you up and running.

It’s a smart approach using proven technology that makes transition today and transformation tomorrow an achievable goal.

And it’s just one more way Fresenius Kabi, with its global presence in infusion technology, is working to make essential medicines and technologies more accessible to everyone, everywhere.
**Built-in patient safety features help reduce risk within large and small institutions alike**

Agilia Infusion System Large Volume Pump with Vigilant Drug’Lib Software has the flexible functionality to meet the day-to-day needs of multiple care areas within large and small hospital environments.

- Vigilant Drug’Lib Software customizes to clinical need – create up to 19 care areas, each area containing as many as 200 drugs with 5 concentrations per drug
- Vigilant Drug’Lib Software helps limit risk of administering unauthorized drugs
- Convenient features such as Weight-based Dosing, Clinical Advisories, Loading Dose, Bolus Dose, Drug X (for non-formulary or new drugs)
- Quick editing of drugs allows your pharmacist to enable/disable these features
- Configurable safety limits reduce costs associated with dose errors and risk of administering unauthorized drugs

**Clinician-friendly interface**

Agilia Infusion System Large Volume Pump packs all essentials into a small, lightweight, portable device with a clinician-friendly interface and infusion sets that adapt to your workflow.

- Small size enhances mobility within the hospital – weighs just 4.4 lbs.
- Battery run time of 8 hours for rates up to 125 mL/h
- Lighthouse icon on the screen indicates Vigilant Drug’Lib is active, gives visual cue of compliance to drug library data sets
- Verified compliance to Vigilant Drug’Lib data sets by requiring user to Opt Out, increasing likelihood of using authorized drugs only
- Programmable pause, Direct and Programmable Bolus features ensure use of pump for bolus doses within soft and hard limits within Vigilant Drug’Lib
- User interface is designed with arrows to help decrease decimal errors more common with numeric keypads
- Unique Occlusivity Check System (OCS) helps provide protection against accidental free flow

**A caring and dedicated team to help implement and support**

Behind every pump is a team dedicated to training your nurses, supporting your pharmacists and consulting with your biomedical engineers to help with adoption of the technology and to provide ongoing support.

- Pharmacy Consulting works with you to maximize use of Vigilant Drug’Lib
- Nurse Implementation team trains your staff to maximize use of your investment
- Ongoing support available from Service Capability & Performance (SCP) certified Technical Services Team
Refer to the product Operator’s Manual and/or Instructions For Use for a complete list of warnings and precautions associated with the device.
